Bataille de polygones

Les joueurs présentent leur carte :

- Si la carte présentée n'est pas un polygone (forme arrondie ou ligne brisée), le joueur passe son tour au tour suivant.
- Le joueur remporte les cartes des adversaires si son polygone a le plus de côtés (ou sommets).
- Le joueur gagne un point lorsqu'il nomme son polygone.

Le gagnant est celui qui a le plus de cartes. Les points sont comptabilisés notamment en cas d'égalité.

Nombre de côtés	Nom du polygone
3	Triangle
4	Quadrilatère (Carré, rectangle, losange…)
5	Pentagone
6	Hexagone
7	Heptagone
8	Octogone
9	Ennéagone
10	Décagone
11	Hendécagone
12	Dodécagone
