

# Insects...

This is the story of two insects : a big black spider (a tarantula in fact) and a beautiful green insect. I don't know the name of the green insect but he is very small and he likes to sit under trees and flowers. The spider prefers houses and hot climates.

# Nessie

Nessie is the name of a very big monster. She is perhaps fiction or possibly a reality, but the story says that she exists in a big lake in Scotland. She lives under the water. The lake where she lives is called Loch Ness. Loch is the Scottish for lake. Scientists say that Nessie is the same colour as the water, grey-brown. Many tourists who visit Scotland try to see Nessie but it's very difficult to see her. Nessie probably lives at the bottom of the lake and eats very small fish, lots and lots of fish. Some people think that there are two or three monsters like Nessie in Loch Ness. Nessie is probably more than twenty metres long.

# Insects...

1. How many insects are there ?
2. What colour is the spider ?
3. What is the name of the green insect ?
4. Is the green insect big or small ?
5. What does the spider like ?

# Insects...

1. How many insects are there ?
2. What colour is the spider ?
3. What is the name of the green insect ?
4. Is the green insect big or small ?
5. What does the spider like ?

1. What is Nessie ?

- a fish
- a monster
